vertex cover
maximum matching
distance to complete
maximum leaf number
distance to constant components
distance to co-cluster
clique cover number
edge clique cover number
twin-cover number
distance to stars
feedback edge set
distance to linear forest
vertex integrity
bandwidth
maximum independent set
neighborhood diversity
distance to cluster
feedback vertex set
treedepth
genus
cutwidth
topological bandwidth
maximum induced matching
domination number
distance to cograph
modular-width
distance to interval
distance to block
shrub-depth
distance to outerplanar
carving-width
pathwidth+maxdegree
pathwidth
diameter
distance to chordal
odd cycle transversal
linear clique-width
linear rank width
distance to planar
treewidth
maximum degree
average distance
distance to perfect
clique width
book thickness
branch width
distance to maximum degree
girth
rank width
acyclic chromatic number
bisection bandwidth
h-index
boxicity
inf-flip-width
boolean width
degeneracy
chromatic number
twin width
average degree
arboricity
chordality
maximum clique
radius-r flip-width
minimum degree
domatic number
edge connectivity
