vertex cover
maximum matching
distance to complete
distance to constant components
maximum leaf number
distance to co-cluster
clique cover number
twin-cover number
edge clique cover number
vertex integrity
distance to stars
distance to linear forest
feedback edge set
bandwidth
maximum independent set
neighborhood diversity
distance to cluster
treedepth
feedback vertex set
cutwidth
genus
topological bandwidth
maximum induced matching
domination number
modular-width
distance to cograph
shrub-depth
distance to interval
distance to block
pathwidth
carving-width
distance to outerplanar
pathwidth+maxdegree
diameter
linear clique-width
linear rank width
distance to chordal
odd cycle transversal
maximum degree
treewidth
distance to planar
average distance
distance to perfect
distance to maximum degree
rank width
branch width
book thickness
girth
h-index
boolean width
inf-flip-width
acyclic chromatic number
clique width
boxicity
degeneracy
twin width
chromatic number
arboricity
average degree
radius-r flip-width
chordality
maximum clique
minimum degree
bisection bandwidth
domatic number
edge connectivity
