vertex cover
distance to constant components
maximum leaf number
distance to complete
maximum matching
bandwidth
vertex integrity
feedback edge set
distance to linear forest
distance to stars
twin-cover number
edge clique cover number
clique cover number
distance to co-cluster
topological bandwidth
cutwidth
genus
treedepth
feedback vertex set
neighborhood diversity
distance to cluster
maximum independent set
carving-width
pathwidth+maxdegree
pathwidth
distance to outerplanar
shrub-depth
distance to block
modular-width
distance to interval
domination number
maximum induced matching
distance to cograph
maximum degree
treewidth
distance to planar
linear rank width
linear clique-width
odd cycle transversal
distance to chordal
diameter
distance to maximum degree
book thickness
branch width
clique width
distance to perfect
average distance
bisection bandwidth
h-index
acyclic chromatic number
rank width
girth
degeneracy
inf-flip-width
boolean width
boxicity
arboricity
average degree
twin width
chromatic number
minimum degree
radius-r flip-width
maximum clique
chordality
edge connectivity
domatic number
