vertex cover
maximum leaf number
distance to constant components
distance to complete
maximum matching
bandwidth
feedback edge set
distance to linear forest
distance to stars
twin-cover number
vertex integrity
edge clique cover number
clique cover number
distance to co-cluster
topological bandwidth
genus
cutwidth
feedback vertex set
distance to cluster
treedepth
neighborhood diversity
maximum independent set
pathwidth+maxdegree
carving-width
pathwidth
distance to outerplanar
distance to block
distance to interval
shrub-depth
modular-width
domination number
maximum induced matching
distance to cograph
maximum degree
treewidth
distance to planar
inf-flip-width
odd cycle transversal
distance to chordal
linear rank width
linear clique-width
diameter
distance to maximum degree
book thickness
branch width
rank width
distance to perfect
average distance
h-index
acyclic chromatic number
boolean width
girth
degeneracy
twin width
boxicity
clique width
average degree
arboricity
chromatic number
radius-r flip-width
bisection bandwidth
minimum degree
maximum clique
chordality
edge connectivity
domatic number
