vertex cover
maximum matching
distance to complete
distance to constant components
maximum leaf number
distance to co-cluster
clique cover number
edge clique cover number
twin-cover number
vertex integrity
distance to stars
distance to linear forest
feedback edge set
bandwidth
maximum independent set
neighborhood diversity
distance to cluster
treedepth
feedback vertex set
cutwidth
genus
topological bandwidth
distance to cograph
maximum induced matching
modular-width
shrub-depth
distance to block
distance to interval
distance to outerplanar
pathwidth
carving-width
pathwidth+maxdegree
diameter
linear clique-width
distance to chordal
linear rank width
inf-flip-width
odd cycle transversal
distance to planar
treewidth
maximum degree
average distance
distance to perfect
rank width
branch width
book thickness
distance to maximum degree
girth
boolean width
acyclic chromatic number
h-index
clique width
boxicity
twin width
degeneracy
radius-r flip-width
chromatic number
average degree
arboricity
chordality
maximum clique
minimum degree
bisection bandwidth
domatic number
edge connectivity
